

Ivica Kostic

ivica.kostic@uis.no • [webpage](#) • +47 908 00 902

Citizenship: Croatian

Research interests

Conversational Search, Conversational Recommender Systems,
Information Retrieval, Natural Language Processing

Education

- | | |
|--------------------|---|
| Jul 2021 – Present | University of Stavanger – Stavanger, Norway
PhD Fellowship in Conversational AI
Supervisor: Prof. Krisztian Balog |
| 2019 – 2021 | University of Stavanger – Stavanger, Norway
Degree: Master of Science
Programme: Master's Degree Programme in Applied Data Science
Mentors: Prof. Krisztian Balog, Dr. Filip Radlinski (Google) |
| 2018 – 2019 | University of Stavanger – Stavanger, Norway
Degree: Bachelor of Engineering
Programme: Bachelor's Degree Program in Control Engineering and Circuit Design
Programme option: Automation and electronics design
Mentor: Prof. Trygve Eftestøl |

Publications

- | | |
|------|--|
| 2021 | Soliciting User Preferences in Conversational Recommender Systems via Usage-related Questions
Ivica Kostic, Krisztian Balog, Filip Radlinski
<i>Fifteenth ACM Conference on Recommender Systems (RecSys '21)</i> , pp. 724–729, 2021. |
|------|--|

Research experience

- Summer 2021 **TREC CAsT 2021 participation** (University of Stavanger)
Led the participation of the IAI group at Text REtrieval Conference Conversational Assistance Track (TREC CAsT), with the goal of developing a strong baseline system, which can serve as a basis for future research on conversational search.
- Spring 2021 **Master's thesis** (University of Stavanger)
Conducted research on preference elicitation in conversational recommender systems by asking implicit questions based on item usage. Utilized multi-staged data annotation protocol using crowdsourcing to gather a high-quality dataset which was used to train a sequence-to-sequence neural model. This project led to publication at RecSys'21 with a journal extension currently in the making.
- Fall 2020 **Neural IAI MovieBot**
Used state-of-the-art deep learning approaches for natural language understanding and intent detection to further develop the [IAI MovieBot](#) conversational movie recommender system. Other tasks involved making the system more modular and building documentation using Sphinx.

Teaching experience

- Fall 2021 **Teaching assistant, DAT640: Information retrieval and text mining (University of Stavanger)**
Responsible for creating, guiding students to complete, and evaluating graded assignments. Developed a framework for automated evaluation using Pytest. Topics include search engine architecture, text pre-processing and indexing, retrieval models and evaluation, web search, semantic search, text clustering and categorization.
- Spring 2021 **Teaching assistant, ELE520: Machine learning (University of Stavanger)**
Spring 2020 Responsible for helping students solve theoretical and practical graded assignments,
Spring 2019 and evaluating assignment submissions. Topics include Bayes decision theory, estimating the statistical functions using parametric and non-parametric methods, linear discriminant functions, iterative gradient descent, neural networks, clustering.
- Fall 2021 **Teaching assistant, MOD510: Modeling and Computational Engineering (University of Stavanger)**
Responsible for helping students solve theoretical and practical graded assignments, and evaluating assignment submissions. Topics include numerical derivation and integration, Monte Carlo and bootstrapping, numerically solving differential equations, simulated annealing, lattice Boltzmann, random walk, and compartment models.

Industry experience

- June 2020 - Jul 2021 (Part time) **Presight Solutions (Data Analyst)** – Stavanger, Norway
Responsible for research and development of a predictive model within offshore safety using machine learning algorithms. This entailed cleaning and processing raw data, training and evaluating several models, and working with the development team to integrate the model into the main application.
- Sep 2018 - June 2020 (Part time) **Presight Solutions (Software Engineer)** – Stavanger, Norway
The tasks in this position included software R&D, maintenance, further development of existing products, and development of new solutions. The obligations often extended to other parts of the full life cycle of software development.
- Summer 2018 **Presight Solutions (R&D Intern)** – Stavanger, Norway
Responsible for creating a miniature (LEGO) model of a city which contains a variety of hidden sensors and a wireless micro-controller (ESP8266) programmed in Python to send sensor updates to the companies main application. This was showcased at Nordic Edge Expo and Conference 2018 in Stavanger with the theme Smart City.

Additional courses

- Spring 2017 **Introduction to Computational Thinking and Data Science**
Spring 2017 **Computational Probability and Inference**
Spring 2017 **Learning from Data (Machine Learning)**
Courses taken on edX from Caltech and MIT

Technical skills

Programming languages

Proficient in: Python, Javascript, C#, VB.NET, HTML, CSS
Familiar with: R, Matlab, Shell script

Software

Visual Studio Code, Git, L^AT_EX

Languages

Croatian (native), English (fluent), Norwegian (advanced)

Other interests

Board sports when the weather allows and board games when it does not.
